PROFESSIONAL SUMMARY

PHP Laravel Backend Developer with 3+ years of professional experience in web development, specializing in Laravel application development, REST API development, MySQL database management, and third-party payment gateway integrations. Experienced in migrating legacy PHP applications to Laravel, optimizing database queries, implementing authentication and authorization, and deploying and debugging production applications. Also independently developed and maintained web applications, handling frontend and backend implementation, database design, and business logic.

TECHNICAL SKILLS

- **Languages:** PHP, Core PHP, SQL, HTML, CSS, JavaScript (Basic)
- **Frameworks:** Laravel, Bootstrap
- **Database:** MySQL, database design, Eloquent ORM, relationships, joins, indexing, transactions, query optimization
- **Backend Development:** REST APIs, MVC architecture, service classes, dependency injection, validation, exception handling, CRUD operations
- **Authentication & Security:** Laravel Sanctum, middleware, role-based access control, Gates, Policies
- **Laravel Features:** Queues, Jobs, Scheduler, Events, Listeners, Notifications, Composer
- **Integrations:** HDFC Payment Gateway, Razorpay
- **Deployment & Debugging:** Environment configuration, production troubleshooting, application deployment
- **Tools:** Git, GitHub, Docker (personal projects), manual browser-based testing

PROFESSIONAL EXPERIENCE

PHP Developer | Ultimate Knowledge - ***April 2026 – September 2026***

- Worked on web development tasks using HTML, CSS, JavaScript, and Bootstrap.
- Implemented and modified frontend components based on project requirements.
- Supported website functionality and resolved frontend issues.

PHP Laravel Developer | TestPrepKart - ***August 2023 – March 2026***

- Developed and maintained Laravel applications, implementing routes, controllers, business logic, and database operations.
- Migrated and refactored legacy PHP functionality into Laravel using controllers, models, Eloquent ORM, Query Builder, and Blade integration.
- Designed and developed REST APIs from scratch, implementing request validation, Sanctum authentication, pagination, filtering, search, and structured JSON responses.
- Optimized MySQL queries, joins, indexes, and database structures to improve query efficiency and application performance.
- Designed database schemas and relationships from scratch while maintaining and improving existing database structures.
- Implemented authentication, role-based permissions, middleware, and protected application endpoints.
- Independently implemented HDFC Payment Gateway integration, including payment initiation, success and failure handling, and backend payment verification.
- Developed and maintained admin dashboards and CRUD functionality for student, course, and study-material management.
- Worked on backend functionality for live classes and scheduling.
- Used Laravel service classes and dependency injection to organize business logic and improve maintainability.
- Implemented Laravel queues, jobs, and scheduled tasks in projects.
- Deployed applications, configured production environments, and troubleshot application and database issues.

- Performed manual browser-based testing and production debugging to identify and resolve functional issues.

Support Engineer | The Global Software Solution Corporation - **January 2023 – July 2023**

- Provided client support and assisted with resolving customer queries and reported issues.
- Communicated with clients to understand their concerns and provide appropriate assistance.

INDEPENDENT PROJECTS

1. UniboardHub

Education Platform | Laravel, PHP, MySQL | Website: https://uniboardhub.com/

- Independently developed and maintained an education platform serving students with educational content and study materials.
- Implemented backend functionality, database operations, and administrative features.
- Worked on application routing, data management, and content-related functionality.

2. Curious Corner

Laravel Web Application | PHP, Laravel, MySQL | Website: https://uniboardhub.com/curious-corner/

- Independently developed the application, including frontend and backend functionality.
- Implemented authentication, admin panel functionality, and product/service management.
- Developed article and news CRUD operations, category management, search, and pagination.
- Implemented payment-related functionality, database operations, and SEO-friendly URLs.

3. Doon Homestay

Full-Stack Web Application | PHP, Laravel, MySQL | Website: https://doonhomestay.com/

- Independently developed the website, handling both frontend and backend implementation.
- Implemented application routes, controllers, database operations, and pagination.
- Used database transactions where required to maintain data consistency.
- Integrated Razorpay payment processing, including payment flow handling and backend verification.

EDUCATION

Master of Computer Applications (MCA)

Dr. A.P.J. Abdul Kalam Technical University (AKTU) | 2023

Bachelor of Science – Computer Science

Chaudhary Charan Singh University (CCS University) | 2021
